Mr. Javier Lumbreras – Artemundi Global Fund

As a result of his deep-rooted passion for fine art and strong track record for investing within the industry, Mr. Javier Lumbreras was inspired to lead among a group of founding art collectors, Artemundi Global Fund (AGF), a strategically diversified art investment fund.

Born into a renown family from Spain with a background in banking, real estate and art, Mr. Lumbreras adheres to a lineage of art collectors. In playing a pivotal role in the international art market, Mr. Lumbreras has served as a consultant to private collectors, a guest lecturer at several banks, institutions, family offices and museums as well as a trustee to international art institutions.

He is the author of the book *The Art of Collecting Art* which has sold out of its first edition; a second edition is being reproduced by Banco Nacional de Mexico, CITIBank.

Today, as founder and CEO of Artemundi Global Fund, Mr. Lumbreras brings his well trained eye and expertise in the acquisition & sale of fine art objects to a very qualified team working for AGF. Together they recognized that an art investment fund has the ability to serve as a valuable asset class investment vehicle, especially amongst volatile traditional markets.

Blending all of these influences together, Artemundi Global Fund provides art collectors and sophisticated investors with an effective vehicle to profit and take pleasure in one of today's most promising and beautiful assets available.

Amongst economic uncertainty, alternative assets serve to be a valuable store of wealth. Art, one of the most intriguing and aesthetically pleasing assets, has performed exceptionally well in recent quarters in contrast to traditional markets.

Artemundi Global Fund (AGF) is a diversified art investment private equity fund with a strategic portfolio that covers half a millennium of universally recognized artists with proven track records. Led by art investment expert and fifth generation art collector Mr. Javier Lumbreras with representative offices in the USA, Latin America and Europe the AGF team pursues strategic genres, the highest regarded artists and their most iconographic works of art in order to achieve an attractive rate of return for investors.

Artemundi Management has successfully invested over \$250,000,000 in the art market over the past twenty years by using accumulated quantitative and qualitative methods, global market arbitrage combined with the ability to identify, interpret and capitalize on specific art transaction opportunities.

Artemundi Global Fund is passionate about having their artwork enjoyed to its fullest potential, allowing their investors to hang the works of art from the fund in their homes or offices on a revolving basis as well as having pieces on loan to recognized international art exhibitions.

In addition to the fund, AGF provides one to one consulting services for individual or institutional investors who want to create their own art portfolio for patrimonial & lineage preservation, investment or

merely for aesthetic and intellectual enjoyment. AGF's practical methods, accurate analysis and highly regarded network enables them to make substantial returns.
